**ADDENDUM # 1**

**May 24, 2016**

**RFQ #7550605**

**TITLE: Continuous Recruitment- Solar Photovoltaic and Wind Turbine**

**Closing Date and Time: June 10, 2016 at 11:00 am**

**Per the issuance of this ADDENDUM #1 (1 page) the following is noted:**

This addendum posts answer to question submitted on line.

**Q1.** Can you explain how this solicitation will be used for procurement above a \$1,200,000 price, if at all? From the solicitation “For total projects costing more than \$1,200,000 the User Agencies shall not use the CR list and shall issue a direct Request for Proposals (RFP) for the specific project.” Will firms be pre-qualified to respond to these RFP’s or will it be completely separate?

**A1.** RFP states that for total projects costing more than \$1,200,000 the User Agencies shall not use the CR list and shall issue a direct Request for Proposals (RFP) for the specific project. Pre-qualified vendors from this requisition are not de facto qualified for other solicitations.

**Q2.** Can you clarify which price category projects that propose to sell power through a power purchase agreement would fall? For example a wind turbine would propose to sell individual kilowatt hours generated by a wind turbine at a specified price per kWh that was less than \$1.00. They would total less than \$100,000 each year but would be for a contract term of 20+ years.

**A2.** The tier structure of this solicitation is based on total project costs, including construction.

**END OF QUESTIONS**

**Max Righter  
Buyer 1**
